矽統科技的肢體偵測技術整合軟體與硬體，提供給您優質的操作體驗。不需任何穿戴式器材，簡化了操作步驟，並且具有快速校正、一秒定位的高精度定位系統，能夠輕鬆實現多個角度的偵測，甚至是大範圍的應用。本產品可識別不同的肢體動作，包括姿勢、手勢和行走，讓您的操作更加流暢自如。設備的架設也十分簡單，只需幾步即可完成，並且支援多種場景。這款肢體偵測設備不僅能夠應用於教育和企業場域，擁有無限的可能性！

The body detection technology of Silicon Integrated Systems Corporation (SiS) integrated software and hardware to bring you outstanding operating experiences. There's no need for any wearable devices, the operations of the compact Mocaps are simplified, and it embeds a high-precision positioning system with quick calibration and one-second positioning. It can also easily realize multi-angle detection, and even large-scale applications. Mocaps can identify different body movements, including postures, gestures and walking, allow your operation to be smoother and more comfortable. The setup of Mocaps is intuitively, and only requires a few steps to complete; it also supports many scenarios. Beyond education and business fileds, scenarios for Mocaps applicaitons are unlimited and unrivaled!

產品特色 / Features

無需穿戴
No need for wearable devices

快速校正
Quick calibration

一秒定位
One-second positioning

架設簡單
Easy set up

三位一體
Three-in-one detection

動作流暢
Smooth movement

虛實整合
Integration of virtuality and reality

應用情境 / Applications

異地展演
Remote performances

行銷宣傳
Marketing and promotion
